Your Own Private Oasis

Building your own personality and lifestyle at home
is easier than you think!

**BREATHE IN
THE GREEN**

Our April Story

Our vision is to change the way you shop for furniture through the creation of the first direct to consumer experience from a furniture industry family. We utilize our decades long relationships to create thoughtful collections that combine function with style and make coming home the best part of your day.

HOME DESIGN FURNITURE BRAND

INTERNATIONAL DESIGN

April Story follows a design and development operation model that emphasizes original furniture design, with collaboration from globally recognized designers as a supplementary element.

GLOBAL MANUFACTURING

April Story integrates excellent global supply chain resources. We have become one of the most systematic and cutting-edge manufacturers of soft furniture and customized home furnishings.

LOCALIZED OPERATIONS

"Localization of an International Brand": April Story examines the local consumer market, develops localized products, and invests in localized marketing efforts.

HOME DESIGN FURNITURE BRAND

**Sofas | Living Room Complements |
Bedding Room Complements | Cabinet System**

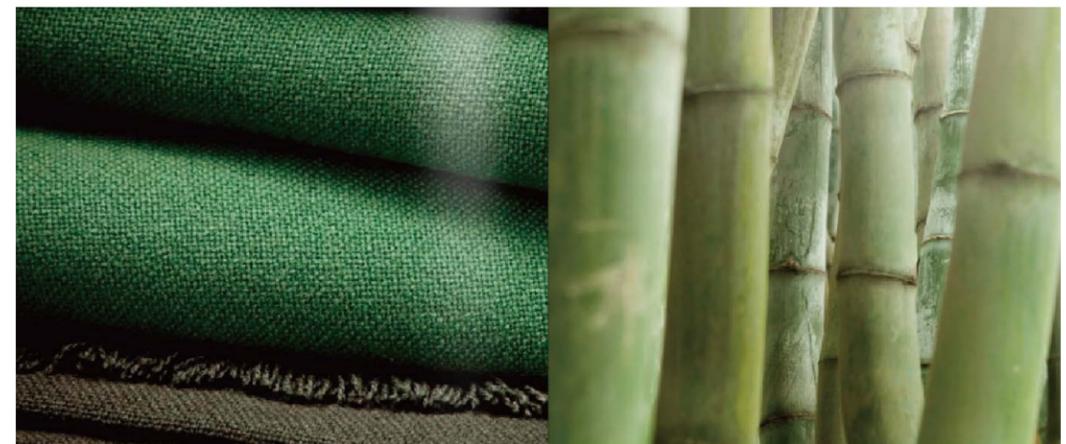

Every work of April Story is a thoughtful design, with warmth and detail in creation.

From the selection of materials to professional handcrafting, we pay great attention to every detail of the product, ensuring consistency in all requirements. Our strict material system selects high-quality raw materials, with a rich variety, excellent texture, and authentic colors, as well as natural environmental protection, shaping the intrinsic value of the product.

- ✓ High color fastness
- ✓ Good abrasion resistance
- ✓ Good breathability
- ✓ Good environmental protection

A piece of carefully selected cowhide, 18 screening processes, rigorous testing and selection system, every step is dedicated to the quality and pursuit, just to present a texture that can withstand scrutiny.

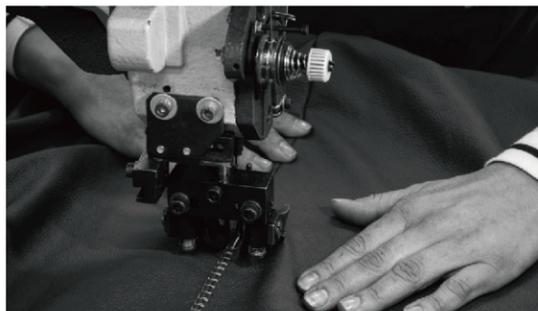

- ✓ Rich in colors
- ✓ Three-dimensional patterns
- ✓ High colorfastness

April Story adopts yarn-dyed weaving technology, which accounts for 7% of the global textile industry. The yarn is dyed before weaving, so the fabric is noble, gorgeous, and shiny, with a soft and delicate hand feel, warm and skin-friendly.

GLOBAL MANUFACTURING, EXCELLENCE IN EVERY DETAIL

The product series of "April Story" is manufactured by our global factories. All systems, procedures, and management operations required for production are strictly based on the We production system model. This is in stark contrast to the methods of other manufacturers who assign.

April Story continuously develops new fabrics and materials, constantly explores the combination of new technologies and traditional craftsmanship, forming an open system that respects creation and craftsmanship.

All our sofa products are produced on lean production lines. The craftsmen on the production line have an average of over 20 years of experience, ensuring the essence of We sofa design and craftsmanship, as well as stable output.

April Story is interpreted by several Italian local craft masters such as FERRULLI GIOVANNI, GORI FRANCO, and GORI FRANCESCO, integrating their mature craftsmanship and mature understanding of design into our products, giving them soul.

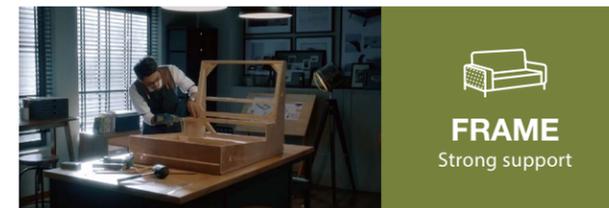

SIX EXCLUSIVE TECHNIQUES

April Story adopts the Italian water dyeing process. Each piece of leather undergoes 36 hours of 360-degree drum tanning, resulting in tight, naturally glossy leather that is environmentally friendly, breathable, and resilient, with clear textures and high color fastness.

April Story sofas are designed according to ergonomics, using a "multi-layered sponge with different densities" stacking process to provide better comfort and strong support during use, ensuring that the sponge quickly rebounds and remains durable and resistant to collapse.

Our sofas' wood undergoes repeated high-temperature sterilization, four-sided fine polishing, and anti-corrosion, anti-insect, and anti-moth treatment. The wood is tough, dense, and has high load-bearing capacity, ensuring that it does not crack or deform during use.

April Story uses high-performance springs with a carbon content of 0.82%, which have been tested 60,000 times without fracture or deformation, meeting the standards of the sofa industry and ensuring the overall support effect of the sofa.

Our lumbar protection technology is ergonomically designed to meet the lumbar protection needs of different people, allowing you to enjoy comfortable support and lumbar support.

Our sofas strictly adhere to the Green Premium environmental protection standards. April Story is a company that uses environmentally friendly water-based adhesives, which are formaldehyde-free, environmentally friendly, non-toxic, non-corrosive, and meet the Ten Ring certification standards.

FLOATING CONTINENT

The sofa adopts a flexible modular combination design, which is suitable for home spaces of different sizes. The special-shaped blocks simulate a moving continent, and the combined modules represent the expansion trend of the "Eighth Continent".

CASTLE

Geometric modules like city walls, solid and reliable, flexible combination of specifications, is a typical representative of modern minimalist style. It's as warm and safe as a castle.

ENVELOPE

The design highlight of the sofa is the use of deep-drawn point technology to create an envelope-like simple shape, while also creating a comfortable sitting experience with a two-stage mid-high waistrest.

WATER DROP

The use of natural water drop form and novel armrest outer line, coupled with the multi-level skin parting process after careful exploration, not only has a fashion aesthetic feeling and complicated process, but also showing the elegant beauty.

THOUSANDS MILES OF MOUNTAINS AND RIVERS

The beauty of Chinese tradition, the new fusion of East and West
 Now when talking about minimalism, the Song Dynasty was the earliest minimalism. Ancient aesthetics, which reached its highest level in the Song Dynasty, required absolute simplicity, that is, simplicity of roundness, squareness, plain color, and texture.

LANPING GREEN FIELD

With the snow leopard, a unique animal in China, as an important design element, and the deep-water duck green as the main color, it is like a snow leopard haunting the snow-line mountains and fields, revealing the calm and prepared temperament of the snow leopard.
